

**RESIDENTIAL APPLICATION FOR PORTABLE NOISE MONITORING
Baltimore/Washington International Thurgood Marshall Airport**

The portable noise monitoring program is conducted by the Division of Noise and Land Use Compatibility Planning of the Maryland Aviation Administration. The purpose of the residential portable monitoring program is to measure noise levels in selected areas on a temporary basis in order to verify the levels projected by the Airport Noise Zone contours. The final report will provide aircraft noise levels for each day, the percentage of east/west operations, and general information about noise measurements and airport operations.

Please Print or Type the following information:

Name _____

Daytime Phone Number _____

Address _____

Please read and initial each statement:

_____ I understand that this sample period of noise monitoring is for informational purposes only. The measured noise levels are not synonymous with or used to establish the contours of the BWI Airport Noise Zone and are not used to establish eligibility for any Homeowner Assistance Programs, including the Residential Soundproofing Program.

_____ I understand that the noise monitoring equipment, especially the microphone cable, is delicate and can be damaged by lawn mowers or other rough use.

_____ I will take reasonable safeguards for protecting this equipment while it is on my property.
